## Health & Fitness Center

### Is it good to work out in summer?

In hot weather increases our body temperature. Our body's natural cooling system can start to fail if we're exposed to soaring temperatures for too long. The result may be heat exhaustion or even suffer heat stroke. As an alternative, workout indoors at the Cornell Club! Stay cool, hydrated and get the beach body you want. See you there!

*Members are required to make reservations in advance by booking a reservation using our online booking form, available by logging onto your member account online or through our app.*

#### Questions?
